

# SMART INDIA HACKATHON 2025

## TITLE PAGE

- **Problem Statement ID – SIH25143**
- **Problem Statement Title-**Real-time based pressure measurement device to optimize orthotic design and patient outcomes.
- **Theme-**MedTech / BioTech / HealthTech
- **PS Category- Hardware**
- **Team ID- 94888**
- **Team Name (Registered on portal) – ZETA1**

# IDEA TITLE

## OrthoSense – Real-Time Pressure Mapping System for Orthotic Optimization

**DETAILED SOLUTION** - A smart AI-powered orthotic system that continuously measures foot pressure in real time and automatically adjusts support using adaptive sensors and actuators.

**Flexible Pressure Sensor Array**

**Adaptive Feedback Layer**

**On-Device Processing**

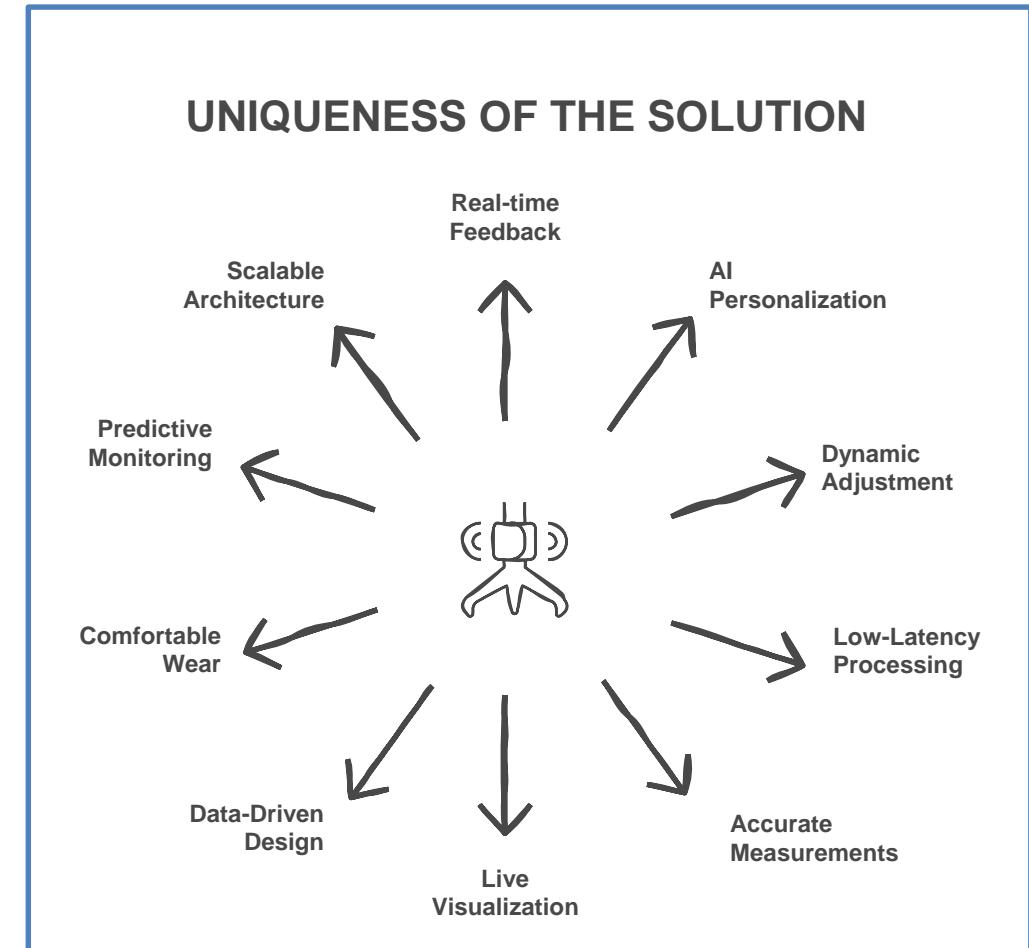

**AI/ML-Based Pattern Analysis**

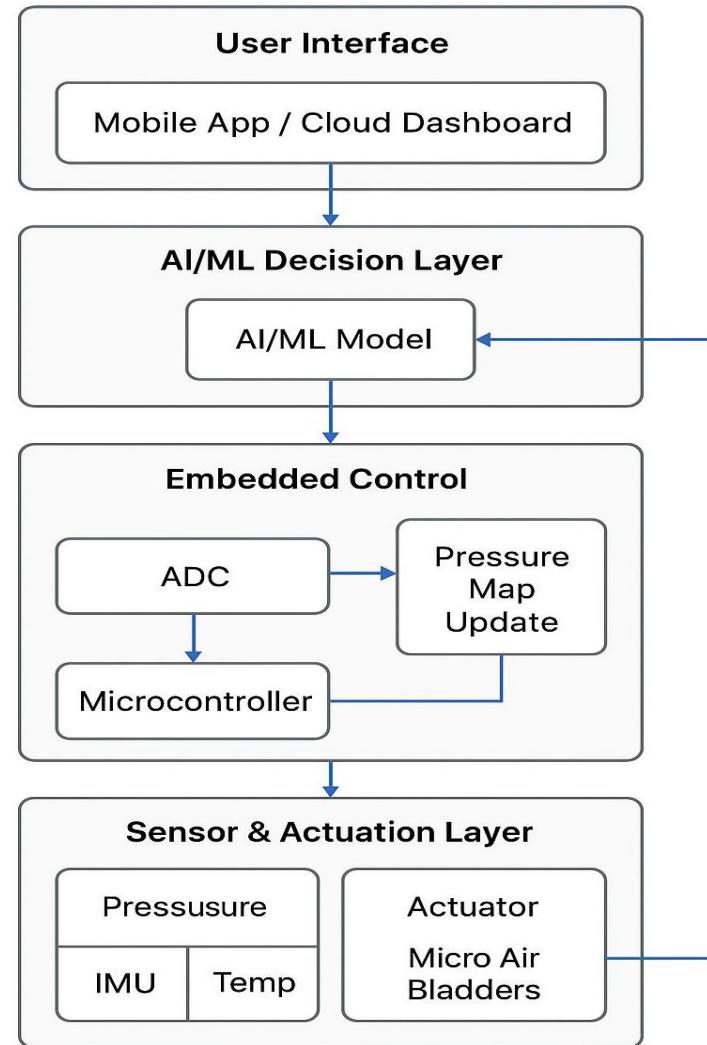

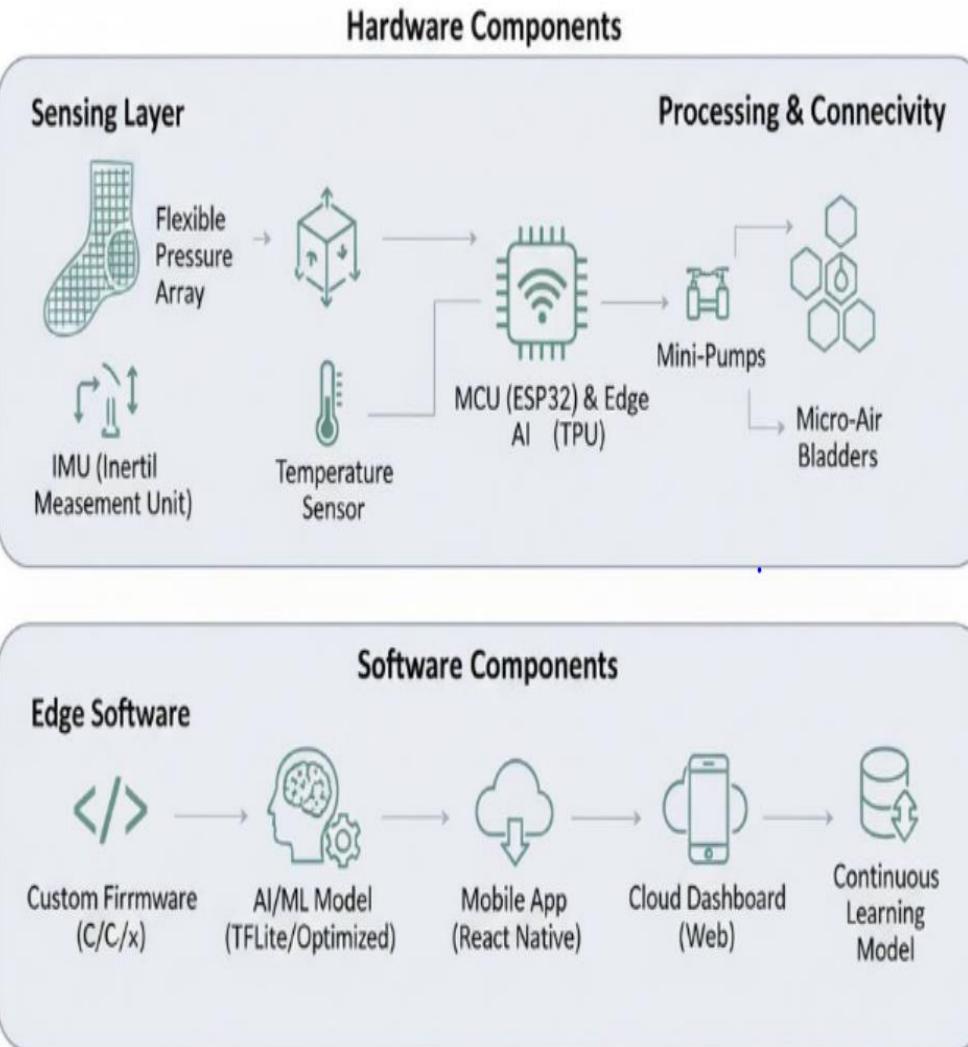

**User Interface (Mobile or Tablet)**

**KEY FEATURES**

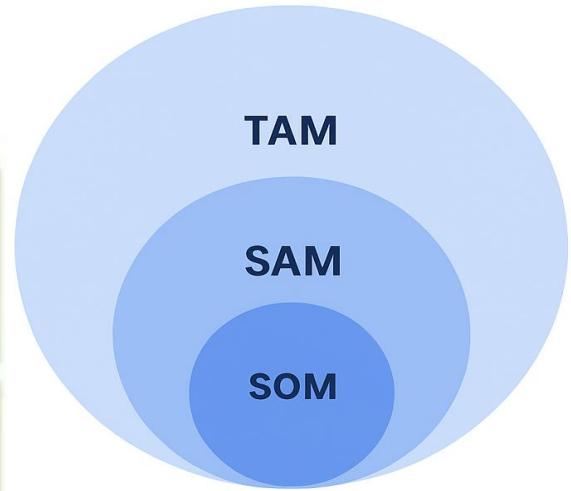

# TECHNICAL APPROACH

# FEASIBILITY AND VIABILITY

Feasibility of the Idea	Potential Challenges and Risks	Strategies for overcoming challenges
Technical Feasibility (AI/MIL, Edge Computing)	Hardware Durability (Continuous Flexing)	Rugged, Flexible Design
Communication Feasibility (Data Transmission)	Connectivity Issues (In-Shoe Signal Loss)	Robust Local Storage & Offline AI
Operational Feasibility (Daily Use/Wearable)	Battery Life/Charging	Optimized Power Management
Economic Feasibility (Low-Cost Components)	Regulatory Approval (Medical Device)	Targeted Clinical Trials

**₹5,000 Cr**  
GLOBAL ORTHOTIC, PROSTHETIC  
DEVICES MARKET

**₹800 Cr**  
INDIAN ORTHOTIC & REHABILITATION  
DEVICE MARKET

**₹40 Cr**  
TARGETED CLINICS & PATIENTS  
IN 3-5 YEARS

## Cost Structure & Revenue Streams

**Cost Structure:** Initial hardware and microcontrollers software development and AI model training ,IoT connectivity marketing and distribution expenses.

**Revenue Streams:** Direct sales of the smart rover to farmers and agricultural companies , service and maintenance contracts; partnerships with agri-tech firms for data and insights monetization.

# IMPACT AND BENEFITS

## Potential Impact on the Target Audience (Patients & Clinicians)

- ✓ Prevents Ulcers & Tissue Injury
- Reduces Chronic Pain
- ✓ Predicts Chronic Pain treatment
- Empowers patients with custom-fit orthotics for improved comfort.
- ✓ Enhances rehabilitation outcomes through real-time pressure data.
- ✓ Promotes data-driven healthcare decisions for doctors

## Benefits of the Solution

### Social

Enhances patient comfort and mobility  
Promotes inclusive healthcare with affordable wearable tech.

### Economic

Enables data-driven orthotic manufacturing, saving design time.  
Supports remote patient monitoring, reducing frequent hospital visits.

### Healthcare & Environmental

Promotes sustainable, reusable orthotic design with minimal material waste.

#### Orthotic Adjustment Time

3-5 Clinic Visits

#### Adaptival System

1 Initial Visit + Remote Refinement

#### Potential Cost Savings (Per High-Risk Patient)

₹1,460,000

₹1,40,000

Lifetime Savings Potential:  
97.3% Reduction in High-Cost Risk
